LCRA WSC Energy is a nonprofit power provider created by the Lower Colorado River Authority. We operate in the Electric Reliability Council of Texas. LCRA WSC Energy is an experienced partner to electric cooperatives, municipalities and other market participants and offers a variety of power supply products and energy services.

Wholesale power solutions tailored to your needs and your customers' demands.

We offer competitively priced wholesale power solutions and customizable packages designed to meet your load management objectives.

Our menu of energy services includes:

- Electric energy and capacity products
- ERCOT scheduling and settlement services
- Demand response programs
- Renewable energy products
- Metering services and load forecasting
- Regulatory support and tracking
- Other specialized services

Our team of experts is ready to serve you.

Let's connect.

Ann Scott
Director, Power Origination

"We consider LCRA WSC Energy a partner, not just a power provider. When RGEC was facing wholesale power decisions, LCRA WSC Energy took the time to understand our situation and deliver the solutions needed to serve our growing communities. WSC Energy has proven itself to be a trusted and reliable partner to Rio Grande Electric and its members."

Roger Andrade
Rio Grande Electric Cooperative CEO

The LCRA WSC Energy difference

We combine the flexibility of innovative solutions with the security and reliability for which LCRA is known.

Flexible contract terms:
Ask about contract lengths from monthly, seasonal and up to 20 years.

Competitive pricing:
We offer cost-based or market-based price structures.

Diverse products and services:
From full requirements to block transactions, we tailor our solutions to match your needs.

LCRA has powered Central Texas for more than 80 years. It supplies electricity to cities and cooperatives that serve about 1 million Texans and their businesses and homes. LCRA maintains a diverse generation mix that provides customers with reliable, cost-effective power. LCRA Transmission Services Corporation, a separate nonprofit, owns or operates more than 5,200 miles of electric transmission lines and nearly 400 substations.
