

McCamey D to Kendall to Gillespie CREZ 345-kV Transmission Line Project
Questionnaire

This questionnaire is designed to help LCRA Transmission Services Corporation (LCRA TSC) understand public interests and concerns about the proposed McCamey D to Kendall to Gillespie 345 kilovolt (kV) transmission line project. Your input is important to us. The information you provide is one element that is considered in the transmission line environmental assessment and route selection process. Once you have viewed the exhibits, please complete this questionnaire and either leave it at the entrance or send it to the address below by March 10, 2010. *

Sara Morgenroth
Senior Regulatory Case Manager
LCRA Regulatory Services
Mailstop BTC151
P.O. Box 220
Austin, Texas 78767-0220
Fax: (512) 369-4193

NOTE: If you completed a questionnaire during the open houses held by LCRA TSC in May 2009, it is not necessary for you to complete a 2nd questionnaire. However, if you want to complete a 2nd questionnaire at this time, LCRA TSC will gladly accept your comments.

1. Which of the following apply to your situation? (Check all that apply)

- I am located in the project area.
- Potential line route is near my home.
- Potential line route is near my business.
- Proposed substation site is near my home.
- Proposed substation site is near my business.
- Existing transmission line is on my land or near my home.
- Other. Please specify (e.g. I lease land and/or I am responsible for land improvements or upkeep near a potential line route or proposed station site.) _____

* LCRA TSC is subject to Chapter 552 of the Texas Government Code, commonly known as the Public Information Act. Responses to this questionnaire are subject to release as public information unless parts are determined to be exempt from disclosure under the Act. Marking portions of your response as "confidential" will not guarantee that information will not be released under the Act, but it will help us in evaluating whether an exception might apply.

Questionnaire

2. Do you understand why this project is needed? Yes No

If not, what information would be helpful to you in understanding either the project or the need for the project?

3. LCRA TSC and its consultant for this project, PBS&J, consider many environmental and land use features when routing electric transmission facilities, including, but not limited to:

- | | |
|---|---|
| <ul style="list-style-type: none"> • Nearby residences, businesses, schools, churches, hospitals, nursing homes and other structures, and cemeteries • Nearby commercial radio transmitters, microwave relay stations or similar electronic installations • Nearby parks and/or recreational areas | <ul style="list-style-type: none"> • Nearby airport runways, airstrips or heliports • Nearby historical or archeological sites • Agricultural areas irrigated by traveling irrigation systems • Environmentally sensitive areas • Threatened or endangered species • Floodplains • Wind leases |
|---|---|

PBS&J has shown all of these features known to them on the Environmental and Land Use Constraints Map. Are those features accurately located?

Yes No Don't Know

If no, please list them below and mark their correct locations on the Environmental and Land Use Constraints Map.

Are you aware of any other features that are not shown on the Environmental and Land Use Constraints Map or the Aerial Photography?

Yes No

If yes, please list them below and mark them on the Environmental and Land Use Constraints Map.

Questionnaire

4. There are numerous potential route segments on the route map for the proposed transmission line. Which route(s) or route segment(s) do you favor and why? Please note: Completion of this question does not constitute a “vote” for or against any proposed route segments.

5. Which route(s) or route segment(s) do you not favor and why? Please note: Completion of this question does not constitute a “vote” for or against any proposed route segments.

6. The routing and construction of transmission lines involves many considerations. Please rank the following factors in the order of their importance to you. Indicate the most important factor with the number 1, second most important with a 2, third most important with a 3, and so on.

- Maintain reliable electric service
- Use or parallel existing compatible right-of-way (e.g. pipelines, railroads, highways, existing transmission lines) where possible
- Parallel property lines where possible
- Maximize distance from residences
- Maximize distance from schools, churches, nursing homes, etc.
- Maximize distance from commercial buildings
- Maximize distance from historic sites or areas
- Maximize distance from parks and recreational areas
- Minimize visibility of the lines
- Minimize environmental impacts
- Other _____

7. Is there any other information you would like the project team to know about or to take into consideration when evaluating the alternative locations for the new line?

Your name and address are optional.
