

Williamson County Region

LCRA provides water and wastewater utility services in Williamson County as part of an alliance with the Brazos River Authority. In Williamson County, LCRA owns one wastewater treatment plant and one water treatment plant, which serve a rapidly growing population.

Construction of the Liberty Hill Regional Wastewater System was completed and began serving customers in FY 2006. The system continues to grow as developments expand and connect to the system.

The Sandy Creek Regional Water Treatment Plant, which serves the City of Leander, was expanded to 12 mgd during FY 2008. Further expansion of the plant is not anticipated.
