Capital Forecast

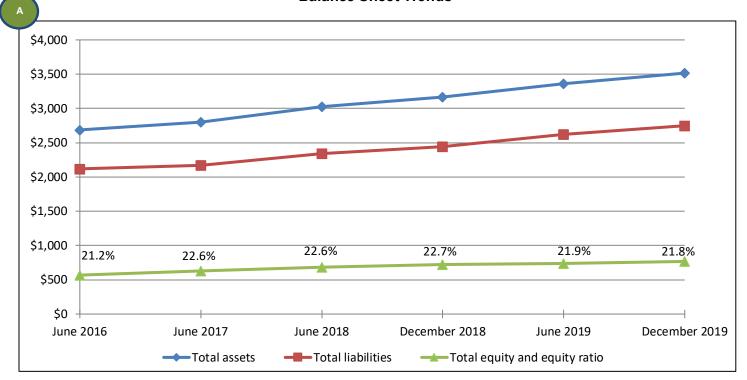

Key takeaways:

- Transmission currently is projecting capital spending for FY 2020 will be \$101.3 million over the capital plan budget of \$341.9 million. The variance is due primarily to an increase in construction and acquisition activities related to 1) projects previously planned for FY 2019 being initiated in FY 2020; 2) newly approved projects accelerated from FY 2021; and 3) budget resets on existing projects. Staff is seeking Board authorization to amend the current fiscal year capital budget to \$443.2 million at the January Board meeting.
- For any project not previously authorized by the Board in the capital plan, authority is delegated to the president and chief executive officer to approve any capital project with a lifetime budget not to exceed \$1.5 million, according to LCRA TSC Board Policy T301 Finance. Additionally, the LCRA TSC Board delegated authority to the president and CEO on a short-term basis to approve new generation interconnection projects and additional funding for capital projects expected to exceed a lifetime budget by 10% and \$300,000. The president and CEO approved the following budget resets this quarter:
 - o Amos Creek Substation Addition from \$12.8 million to \$16.9 million.
 - Castle Mountain Substation Addition from \$3.2 million to \$4.8 million.
 - Crosswinds Substation Addition from \$4.9 million to \$7.7 million.
