

OPEN HOUSES

New Leander-to-Round Rock 138-Kilovolt Transmission Line and Substations Project

**Tuesday, Oct. 13, and Wednesday, Oct. 14
6-8 p.m.**

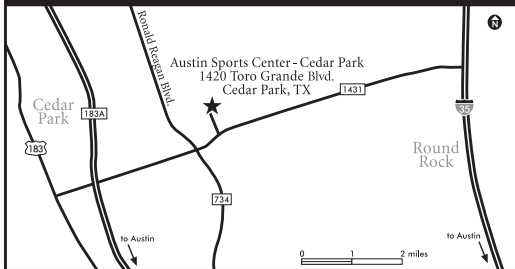

LCRA Transmission Services Corporation (LCRA TSC) invites the public to learn about a new electric transmission line project in Williamson County. LCRA TSC is proposing to build the Leander-Round Rock 138-kV Transmission Line Project.

The proposed project consists of constructing two new substations and a new single-circuit 138-kV transmission line connecting the existing Leander and Round Rock substations to the new substations. The new single-circuit line will be double-circuit-capable. Substation 1 will be constructed near the intersection of Parmer Lane/Ronald Reagan Boulevard and FM 1431. Substation 2 will be built near the intersection of Ronald Reagan Boulevard and Crystal Falls Parkway.

The open houses will have a “come-and-go” format and will not have a formal presentation. Staff members will be available to discuss specific aspects of the project at information stations. Visitors are encouraged to visit each station at their own pace and ask questions. Staff will provide the same information at both open houses. LCRA TSC encourages you to attend the open house that is most convenient for you.

**6-8 p.m.
Tuesday, Oct. 13**
