Re: Leander-Round Rock 138-kV Transmission Line Project in Williamson County, Texas

Property ID: [Appraisal District ID Number]

Dear Landowner:

You have been identified as a landowner who could be affected by an electric transmission line project in your area. I want to personally invite you to an open house on Oct. 13 or 14 to learn more about the Leander-Round Rock 138-kilovolt (kV) electric transmission line project in your area.

LCRA Transmission Services Corporation (TSC) is proposing to build new transmission facilities in southwestern Williamson County. The project consists of constructing two new substations (Substation 1 and Substation 2) and a new single-circuit, double-circuit capable 138-kV transmission line connecting the existing Leander and Round Rock substations to the new substations. Substation 1 will be near the intersection of Parmer Lane/Ronald Reagan Boulevard and FM 1431. Substation 2 will be near the intersection of Ronald Reagan Boulevard and Crystal Falls Parkway. The transmission line will be about 10 to 20 miles long, depending on the final route.

The transmission line is needed to connect Substation 1 and Substation 2 to existing transmission sources. These proposed substations are located between two 138-kV transmission corridors in an area of Williamson County with no transmission service today. This area of Williamson County is one of the fastest-growing areas in the state, which has significantly increased electric demand. Additional electric infrastructure is required to maintain safe and reliable electric service to the area.

LCRA TSC will request Public Utility Commission of Texas (PUC) approval to amend its Certificate of Convenience and Necessity for this project. I have enclosed a list of frequently asked questions explaining the project and providing additional information about LCRA and LCRA TSC. Power Engineers, a consulting firm hired by LCRA TSC, has identified several preliminary alternative transmission line route segments and alternate substation locations for consideration. The route segments and alternate substation locations are shown on the enclosed map. Maps with greater detail and additional project information will be available at the open houses. Preliminary route segments and alternate substation locations are subject to modification based on further study and information gathered at the open houses.

LCRA TSC is inviting the potentially affected landowners and the general public to the open houses. Potentially affected landowners are people listed on the current county tax rolls as owners of land within 300 feet of the center line of any proposed preliminary route segments. Public input is important, especially in evaluating locations for new transmission facilities and assessing a project's impacts. The open houses will be in an informal "come-and-go" format consisting of staffed information stations addressing specific aspects of the project. LCRA TSC staff will not give a formal presentation. Visitors are encouraged to review each information station at their own pace and ask questions. Information will be the same at both open house meetings. We encourage you to attend the meeting that is most convenient for you.

The open houses will be held Tuesday, Oct. 13, at the Austin Sports Center of Cedar Park, 1420 Toro Grande Blvd., and Wednesday, Oct. 14, at the Leander ISD Wiley Middle School Cafeteria, 1526 Raider Way. Your input is greatly appreciated, so we hope you will come by anytime between 6 and 8 p.m.

Open House Details

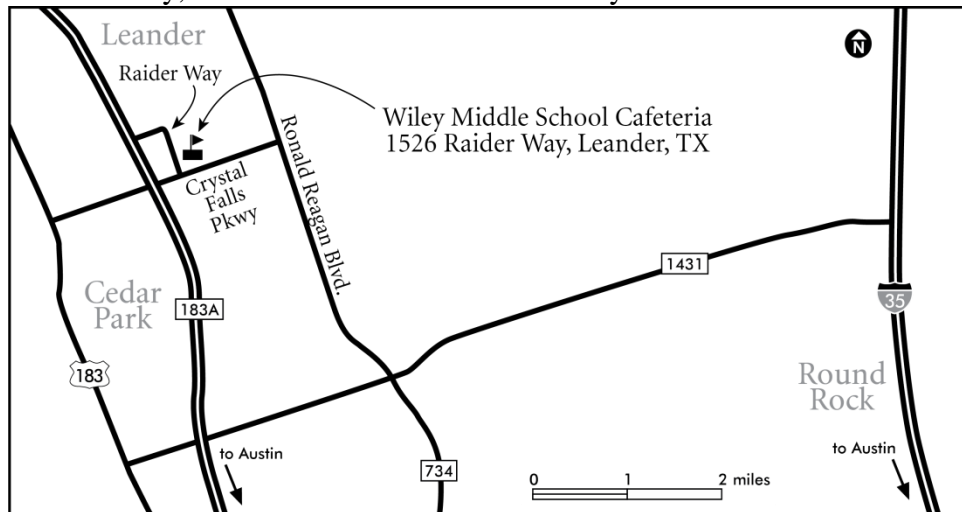

Come-and-go format • No formal presentation
Anytime between 6-8 p.m.

Tuesday, Oct. 13 at the Austin Sports Center of Cedar Park

OR

Wednesday, Oct. 14 at the Leander ISD Wiley Middle School Cafeteria

If you have questions about the project or open houses, please call 800-776-5272, Ext. 7051, or send an email to lcratsc@lcra.org. If you are unable to attend an open house, please visit the project web page at www.lcra.org/lrr for more information. I encourage you to download the questionnaire and mail or e-mail your comments/concerns to me by Oct. 30. I look forward to seeing or hearing from you.

Sincerely,

C Powell
