

**Project Features**

- Preliminary Alternative Segment, Label, and Node
- Preliminary Alternative Segment With Existing 138 kV Transmission Line
- Preliminary Alternative Segment Rebuild Existing 138 kV Transmission Line
- Existing Project Substation
- Study Area

**Existing Utilities**

- Existing 69 kV Transmission Line
- Existing 138 kV Transmission Line
- BTU Service Territory

**Existing Land Use Features**

- Place of Worship
- Communication Tower
- Water Well
- Oil / Gas Well
- Oil / Gas Pipeline

**Transportation Features**

- State Highway
- FM Road
- County / Local Road
- Railroad

**Hydrologic Features**

- River / Stream
- Waterbody
- Wetland
- 100-year Floodplain

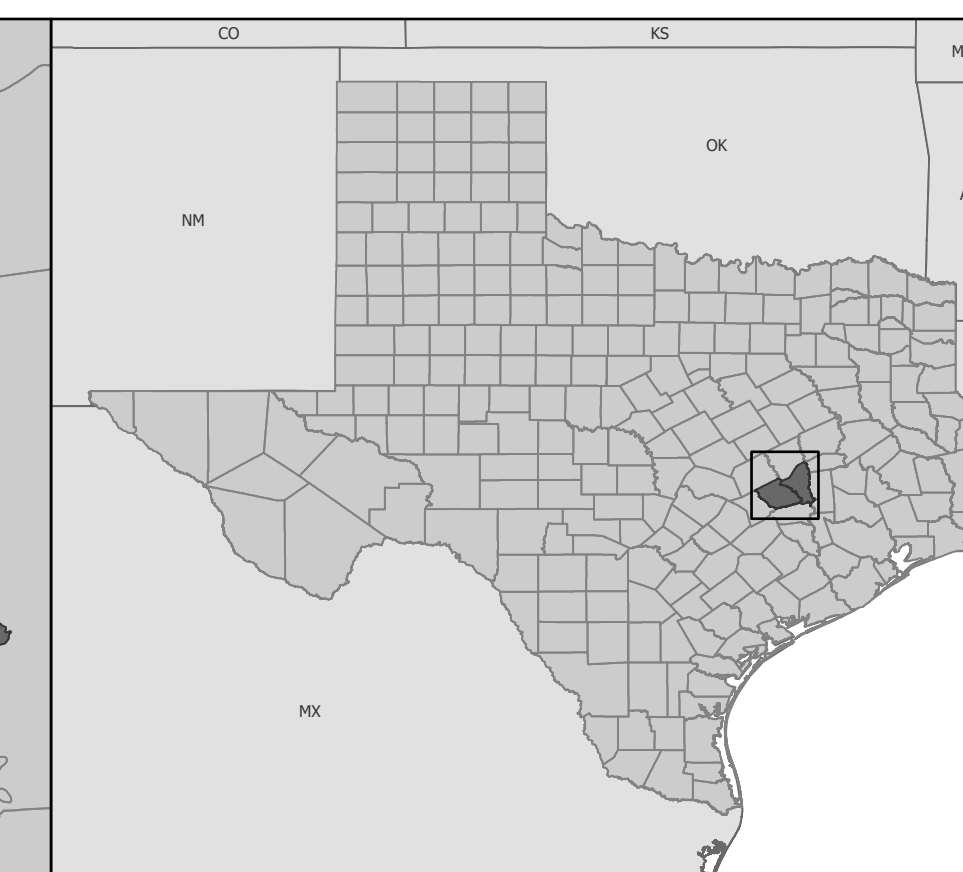

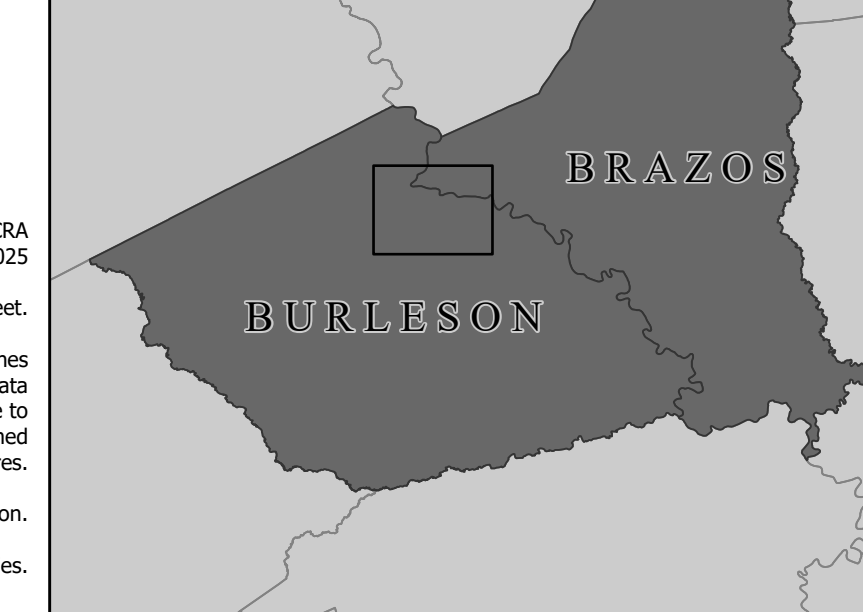

**Cultural Features**

- Historical Marker
- Cemetery

**Administrative Boundaries**

- County Line
- Property Line

**Project Location**

BTU LGRA WSP

Date: 4/7/2026

Aerial Photography: Provided by LGRA Date: 2015  
Accuracy for imagery is approximately ±20 feet.  
Some data layers including tract boundaries, roads, and oil/gas pipelines obtained from third party sources may be inaccurate to varying degrees. These data have not been corrected in all locations and should be used as a general guide to feature locations only. Digitization of proposed transmission line segments was performed based on aerial interpretation of these features.  
Some legend symbols are enlarged for easier identification.  
Some features are exaggerated to better identify potential opportunities.
