Re: Mountain Home Transmission Project
Gillespie, Kerr and Kimble counties, Texas

Property ID: [Appraisal District ID Number]

Dear Landowner:

I am writing to invite you to an open house on June 26, 2018, to learn more about the Mountain Home Transmission Project being planned for your area.

LCRA TSC is proposing to build and operate a new single circuit 138-kilovolt (kV) transmission line in Gillespie, Kerr and possibly in Kimble counties in Texas. The proposed new 138-kV line will connect the existing Hunt Substation, the new Mountain Home Substation and the existing Harper Substation. This project will be approximately 20 miles long, depending on the final route selected. The location of the project study area is shown on the enclosed map.

The open house will be on Tuesday, June 26, from 5:30 to 8 p.m. at the Mountain Home Volunteer Fire Department, 5475 Junction Highway in Mountain Home. The general public and potentially affected landowners are invited. Landowners who are potentially affected are people listed on the current county tax rolls as owners of land within 300 feet of the center line of the proposed preliminary transmission line route segments.

Public input is important, especially in evaluating locations for new transmission facilities and assessing the project's impacts. Your input will be greatly appreciated, so we hope you will come by any time between 5:30 and 8 p.m.

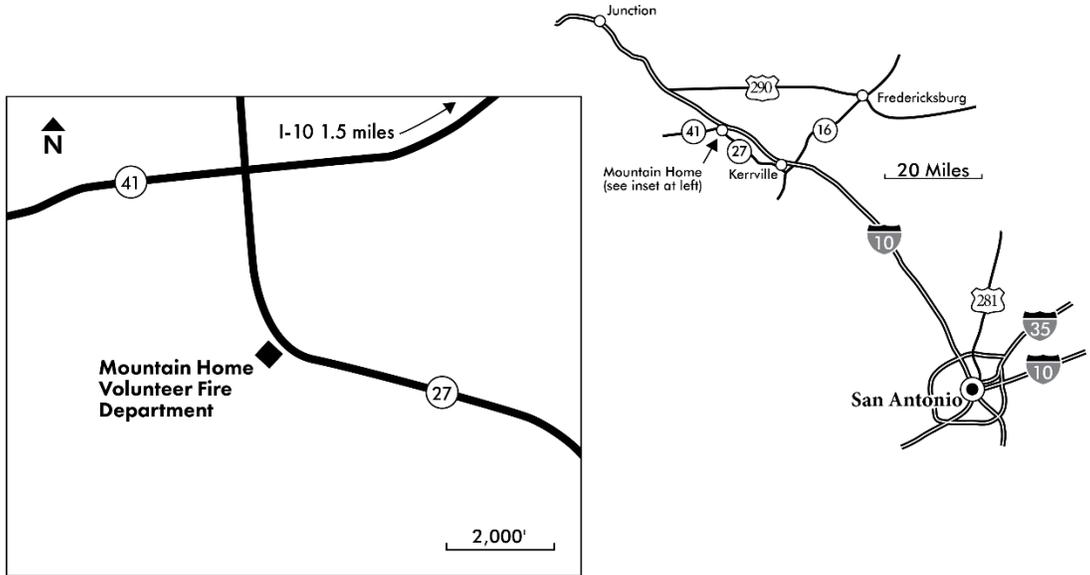

The open house will have an informal format consisting of staffed information stations addressing specific aspects of the project. LCRA TSC will not give a formal presentation. Visitors are encouraged to "come and go" and review each station at their own pace and ask questions.

The purpose of this proposed project is to provide the transmission infrastructure needed to reliably serve electricity demand in Gillespie, Kerr and Kimble counties. The demand for electricity in this area has been growing, and that growth is expected to continue. Electric system planning assessments indicate the existing distribution system will be unable to meet the area's forecasted demand for power by 2021. LCRA TSC is working closely with Central Texas Electric Cooperative to provide long-term reliable service to the region.

LCRA TSC will request the approval of the Public Utility Commission of Texas (PUC) to amend its Certificate of Convenience and Necessity for this project. We have enclosed a list of frequently asked questions explaining the project and providing additional information. POWER Engineers, a consulting firm hired by LCRA TSC for this project, has identified several preliminary alternative transmission line route segments and substation sites for consideration. They are shown on the enclosed map. Maps with greater detail and additional project information will be available at the open

house. The preliminary route segments and alternative substation locations are subject to modification based on further study and information gathered at the open house.

Open House Details
Tuesday, June 26, 2018
5:30 – 8 p.m.
Come-and-go format | No formal presentation
Mountain Home Volunteer Fire Department
5475 Junction Highway
Mountain Home, TX 78058

If you have questions about the project or the open house, please call 800-776-5272, ext. 2690, or send an email to mountainhome@lcra.org. If you are unable to attend the open house, please visit the project web page at www.lcra.org/mountainhome for more information. I encourage you to download the questionnaire and mail or email your comments or concerns to me by July 6, 2018. I look forward to hearing from you.

Sincerely,

Lance Wenmohs
