The public is invited to learn about a new transmission line project in Guadalupe County. LCRA Transmission Services Corporation (LCRA TSC) is proposing to build and operate a new 345-kilovolt (kV) transmission line to connect LCRA TSC’s Zorn and Marion substations in Guadalupe County. Some portion of the line will use existing structures between the Zorn and Clear Springs substations, and the remainder will require new construction on new right of way.

Open House:
New Zorn-Marion 345-kV Electric Transmission Line Project
Thursday, Sept. 17
5:30-7:30 p.m.
